No. of Functional Features Included in the Solution

Date	23 October 2026
Team ID	0827CY231029
Project Name	WanderWise AI Travel Itinerary Planner
Maximum Marks	5 Marks

Functional Features Overview

Eight functional requirement groups are represented in the current source. 'Done in source' records implementation presence and does not certify a new end-to-end run.

S.No	Feature Name	Feature Description	Module / Component	Status	Marks Contribution
1	Authentication	Register and log in with email/password; bcrypt hashes and JWT.	auth.py; security.py	Done in source	Evaluator assessment
2	Traveler preferences	Save style, pace, interests, dietary and mobility notes.	preferences.py; Preferences.jsx	Done in source	Evaluator assessment
3	Ready-made itineraries	Browse six curated destinations and clone a trip to saved plans.	templates.py; Templates.jsx	Done in source	Evaluator assessment
4	Custom AI trip builder	Generate dated day plans from destination, budget and travel inputs.	trips.py; ai_engine.py; TripBuilder.jsx	Done in source	Evaluator assessment
5	Trip management	List, rename and delete trips; edit activities; request regeneration/refinement.	trips.py; Dashboard.jsx; TripDetail.jsx	Done in source	Evaluator assessment
6	Public sharing	Generate a unique link so a viewer can read a shared itinerary without login.	trips.py; ShareView.jsx	Done in source	Evaluator assessment
7	Multi-format export	Download JSON from the API; Markdown and ICS from the trip screen.	trips.py; TripDetail.jsx	Done in source	Evaluator assessment
8	Destination recommendations	Rank destinations from preferences using AI or catalog scoring.	preferences.py; ai_engine.py; Recommend.jsx	Done in source	Evaluator assessment

Feature Summary

Field	Details
Total Features Planned	8 functional requirement groups (FR-1 to FR-8).
Total Features Implemented	8 groups represented in source.
Core / Must-Have Features	8 current functional groups.
Additional / Nice-to-Have Features	4 roadmap ideas: multi-city, collaborative editing, offline access and native mobile app.
Features Tested & Verified	Existing testing README reports 10 manual cases as passed. No new runtime verification or load-test evidence supplied.

Feature Category Breakdown

S.No	Category	Features in Category	Example Features
1	User Interface (UI)	8 groups have user-facing screens or controls	Trip builder, templates, timeline, saved trips.
2	Backend / Logic	8 groups map to API or service logic	Authentication, trip generation, recommendations.
3	Database / Storage	6 groups persist user or trip data	Profiles, preferences, trips, days, activities and logs.
4	API / Integration	3 groups use external formats or optional AI	Custom generation, recommendations, multi-format export.
5	Security / Authentication	3 groups require explicit access boundaries	Login, private trip management and public token sharing.

Categories overlap and should not be added together. Marks remain an evaluator decision.
Project sources: 2. Requirement Analysis/README.md; 6. Project Testing/README.md; backend routers and frontend pages.
