Demonstration of Proposed Features

Date	23 October 2026
Team ID	0827CY231029
Project Name	Waypoint - AI Travel Itinerary Planner
Maximum Marks	1 Mark

Demonstration of Proposed Features

Implementation presence is confirmed from source files. The project contains a written walkthrough and a home-page preview; a complete recorded feature demonstration is not supplied.

S.No	Feature Name	Description	Status	Demonstrated (Yes / No)	Remarks
1	Authentication + preferences	Register/login and save travel inputs.	Implemented	No	Live demonstration not recorded.
2	Ready-made itineraries	Browse six destinations and clone a dated trip.	Implemented	No	Preview shows discovery UI only.
3	Custom AI builder	Generate structured day plans; use rules on failure.	Implemented	No	Show provider mode before demo.
4	Trip management	Daily timeline, saved trips, activity edits and refinement requests.	Implemented	No	Verify unchanged days after refinement.
5	Sharing + export	Public token links; JSON, Markdown and ICS.	Implemented	No	Open a share link without login.
6	Recommendations	Rank destinations from traveler preferences.	Implemented	No	Show AI or local ranking result.

Feature Implementation Summary

Field	Details
Total Features Proposed	6 demonstration bundles covering the 8 functional requirement groups.
Total Features Implemented	6 bundles represented in source.
Total Features Demonstrated	0 complete bundles verified by a supplied recorded demo.
Overall Implementation Rate (%)	100% source coverage of the 6 listed bundles; no runtime certification implied.
